

Call for Papers

Fiscal Consolidation and Regulatory Reform in the EU

The future of the European Union imminently depends on the ability of European governments to regain market confidence in the sustainability of fiscal policies and in countries' commitment to growth-oriented reforms.

Against this background, *FinanzArchiv / Public Finance Analysis* is inviting contributions for a special issue of the Journal that will bring together empirical and theoretical papers on fiscal consolidation and regulatory reform that have a clear policy relevance.

Turnaround times for the special issue will be swift to target publication in December 2012. Submissions will be subject to peer review and are requested to be submitted **by February 17, 2012** or earlier via

www.mohr.de/finanzarchiv

When uploading your paper please indicate the availability of your paper for the special issue in your notes to the editors.

Further questions, for example, regarding possible suitability of manuscripts or topics, may be addressed to Alfons Weichenrieder, a.weichenrieder@em.uni-frankfurt.de.
